

06-17.

- ø 3.0 mm LED
- Vertical and horizontal design

Should it be necessary to indicate many signals on the front-plate or PCB (vertical or horizontal design), then the function security plays a major role. This high quality range of LED-arrays is electrically tested before and after assembly to ensure 100% operation.

Mechanical Data**Material**

LED diameter 3.0 mm

Fixation mode THT

Pitch of solderpins 2.54 mm

Resistance against cleaning fluids yes

Operating temperature [see technical information - LED-Quality](#)

Mechanical Data**Material**

Housing PA6 GF30
